

## For Immediate Release

### **Adventist Health Partners with Hysan Development Offering 1,000 Free Health Screenings to Underserved Groups and Frontline Employees Promoting Vaccinations for a Healthy Community**

(Hong Kong, July 28, 2021) As many Hongkongers are uncertain about the condition of their health and remain hesitant about COVID-19 vaccines, Adventist Health's **Adventist Medical Center (AMC)** has partnered with **Hysan Development** to offer a total of 1,000 health check packages to underserved groups and frontline employees. Regular citizens may also receive health screenings at a discounted price. The program aims to encourage the public to get vaccinated, which will help build an immune barrier in Hong Kong as soon as possible and reduce the risk of community transmission.

#### **Stay Safe, Get Vaccinated**

As of this week, the **Adventist Health x Hysan Vaccination Promotion Centre**, located in Leighton Centre in Causeway Bay, has already begun offering free health screenings to underserved groups and frontline employees holding valid vouchers. The health screening includes a physical examination, blood test, and collection of medical history to determine whether a participant has diabetes, gout, cardiovascular disease, etc. Assessment of kidney function is included as well, providing participants with a clear picture of their health condition before getting vaccinated. A health educator from AMC is also stationed at the Vaccination Promotion Centre. Participants are invited to receive health consultation services, and if needed, may make an appointment with an AMC doctor to discuss their medical report or seek further advice, all free of charge. Depending on their doctor's recommendation, participants may then free to choose to receive their vaccinations at Adventist Medical Center – Taikoo Place, Hong Kong Adventist Hospital – Stubbs Road or other Community Vaccination Centres.

The Vaccination Promotion Centre also provides self-paid antibody testing service (COVID-19 Vaccine Efficacy Test), which is managed by Hong Kong Adventist Hospital's Clinical Laboratory and Pathology, a Government-approved COVID-19 and antibody testing facility.

"We are very honored to have the opportunity to partner with Hysan Development to promote COVID-19 vaccinations," says **Mr. Alex Lan, President / CEO of Hong Kong Adventist Hospital**. "Having been a part of the Hong Kong community for over half a century, Adventist Health is not only committed to providing quality healthcare services to the public, but also strives to serve the needy in society through charitable efforts, as part of our mission to extend the healing ministry of Christ."

In 2014, Adventist Health further extended its healthcare services into the community, establishing the first AMC in Causeway Bay. The Center offers one-stop services in general medicine and specialist areas including out-patient services, surgery, diagnostic screening, health assessment, and health education. "In the face of the pandemic, Adventist Health and

Hysan Development are working together to raise awareness of the importance of being vaccinated,” says Mr. Lan. “We are thrilled to be working with Hysan under the threat of COVID-19 to promote the importance of vaccination and allow those in need to have a clearer understanding of their health condition and be able to get vaccinated without fear or reservation. Adventist Health is committed to walking alongside Hongkongers to combat this virus together.”

“We are glad to partner with Adventist Health to promote the vaccination drive through an innovative promotion centre,” says **Mr. Ricky Lui, Chief Operating Officer of Hysan Development**. “Not only are we making use of the Vaccination Promotion Centre to send a positive message, we are teaming up with them to help those on the frontline or the underprivileged learn more about their health status while encouraging vaccination.”

### **Program Details**

The program is divided into two parts: participants will first receive their health screening at the **Adventist Health x Hysan Vaccination Promotion Centre**. Medical reports may then be picked up at either AMC – Causeway Bay or AMC – Taikoo Place, where participants will also meet with a doctor. Should they choose to get vaccinated (Sinovac COVID-19 Vaccine (Vero Cell), Inactivated, CoronaVac), they may make an appointment to receive their vaccination at AMC – Taikoo Place or Hong Kong Adventist Hospital – Stubbs Road.

Separately, those ineligible for the free program but interested in paying for a pre-COVID vaccination health screening may also undergo an assessment at the **Adventist Health x Hysan Vaccination Promotion Centre** at a discounted rate.

### **About Adventist Medical Center**

The Adventist Medical Center is inheriting our mission “Extending the Healing Ministry of Christ”. We strive to provide top-tier medical service to patients, hoping to spread the healing ministry of Christ into the community. Our Causeway Bay clinic and Taikoo Place clinic puts the patient’s health at the forefront, offering one-stop, professional services in general medicine and specialist areas; as well as out-patient surgeries, diagnostic screening, numerous types of wellness assessments and health education classes. Through a well-rounded service, combined with state-of-the-art technologies and a professional team, we aim to take care of any needs patients may have, allowing them to be properly taken care of and receive the appropriate treatment.

### **About Hysan**

Hysan Development Company Limited is a leading property investment, management and development company in Hong Kong with an investment property portfolio of over 4 million square feet of high-quality office, retail and residential space. With roots in the district since the 1920s, Hysan is one of the largest commercial landlords in Causeway Bay.
